

## Domestic Coatings Consulting Services

### Fort Calhoun Station

**Client/Owner:** Omaha Public Power District

**Project Location:** Omaha, NE

CCC&L assisted Fort Calhoun Station in developing a comprehensive reactor containment coatings condition assessment and maintenance program. This effort included:

- Review of plant engineering specifications
- Defining the plant licensing basis with regard to reactor containment coatings
- Performing in-containment walkdowns to determine the condition of safety-related coatings
- Development of a planned maintenance approach for reactor containment coatings
