

Domestic Coatings Consulting Services

Oconee Nuclear Station

Client/Owner: Duke Power Corporation/Duke Energy Corporation

Project Location: Seneca, SC

CCC&L performed a failure analysis for Duke Power Corporation to determine the cause(s) for protective coatings at various locations inside of the Unit 1 reactor containment building. As part of its project effort, CCC&L:

- Reviewed plant engineering specifications
- Reviewed the plant licensing basis with regard to reactor containment coatings
- Performed in-containment walkdowns to determine the condition of the failed coating areas
- Prepared a detailed failure analysis report for Duke Power Corporation to utilize in its subsequent root cause investigation
- Assisted Duke Power Corporation in presenting its findings to the US Nuclear Regulatory Commission
