

Inspection of Natural Gas Lines

Client/Owner: Dominion East Ohio Gas

Project Location: Ohio

CCC&L was retained by Dominion East Ohio Gas to inspect environmentally exposed natural gas lines on an on-going basis. The law requires that every environmentally exposed gas line be inspected once every three years. The inspections involve:

- On-site visual inspection of each exposed gas line coating
- On-site measurement for gas leak
- Providing individual reports for each line which includes gas line coating evaluation and pictorial record.
- Developing a comprehensive database of all the Dominion East Ohio Gas environmentally exposed natural gas lines which includes the records of each evaluation.
